About Me

I'm a self-taught developer currently focused on building modern web applications using TypeScript, Next.js, and Tailwind CSS. I also have experience working with ASP.NET Core. While I initially explored game development, 3D modeling, and shaders, my recent work and interests are rooted more in frontend and full-stack web app development.

Skills

- **TypeScript & JavaScript:**
Modern, strongly-typed development for frontend and full-stack projects.
- **Next.js & React:**
Building scalable, SEO-friendly web applications with server-side rendering and API routes.
- **ASP.NET Core:**
Capable of building backends, APIs, and web apps using Razor Pages and MVC.
- **Tailwind CSS:**
Designing fast and responsive UIs with a utility-first CSS framework.
- **Git & GitHub:**
Managing version control and collaboration across multiple projects.
- **Writing & Documentation:**
Creating developer-friendly documentation and clean code explanations.

Projects

- **Professional Perfume & Attar Prompt Generator (Live)**
A dedicated prompt generator for crafting high-quality perfume and attar marketing prompts. Built with Next.js and Tailwind CSS for a smooth, elegant UX.
<https://project-ad-sepia.vercel.app/>
- **Perfume E-commerce Site (In Progress)**
A stylish e-commerce platform for perfumes built with Next.js and TypeScript. Currently developing dynamic routing, filtering, and elegant UI.
<https://project-at-six.vercel.app/>
- **E-commerce Store**
A fully functional ASP.NET Core Razor Pages web app with features like authentication, cart management, product browsing, and admin tools.
