Experience

Open Source Contributor (remote)

Oct 2025

GitHub

- Merged pull requests across the core app and marketing website, improving documentation, UX and reliability.
- Implemented a Mail Server Configuration section in the docs, clarifying setup steps for new users and reducing configuration mistakes.
- Fixed the registerHandler flow to send the correct error messages, improving debuggability for failed registrations.
- Built a new Blog page with the ability to create and manage posts, enabling the team to share release notes and tutorials from within the app.
- Created an About Us page and added links to the Features documentation, improving navigation and project discoverability.
- Tech: JavaScript/TypeScript, Node.js, React, Git, GitHub, Markdown, open-source workflow (issues, branches, PR reviews).

Achievements

Hacktoberfest 2025 - Supercontributor

- Earned Supercontributor status by completing multiple approved pull requests across open-source projects.
- Holopin badge board: <http://holopin.io/@anthonyfinney>

Personal Projects

Kanza Royal Perfumery (E-commerce Platform)

URL: <https://project-at-six.vercel.app/>

- Developed a full-featured niche e-commerce platform for luxury perfume oils ("Attars"), featuring a responsive design that showcases high-end products with a "majlis" (community) focus.
- Implemented core e-commerce functionalities, including product collections, a secure shopping cart, user authentication, and a streamlined checkout process supporting both Cash on Delivery and online payments.

Portfolio

URL: <https://anthonyfinney.is-a.dev/>

- Designed and deployed a personal portfolio website to serve as a central hub for professional identity, showcasing technical skills, past projects, and contact information.
- Established a professional online presence utilizing a custom subdomain (is-a.dev), improving personal branding and SEO visibility for potential recruiters.
